

# The top 19 apps I use in my FBA business (15 are FREE!)

**Amazon Seller** - The must-have app for the Amazon Seller. You can scan, sell, check your inventory, email customers, check sales, reprice inventory, manage orders, and so much more.

**Amazon** - A great app to use to check the prices of your competition, how many items other sellers have in stock, product reviews, and more. My favorite feature is that it scans not just the barcode, but also the item itself to find matches.

**\*Profit Bandit** - This is the app I use the most. It's my go-to app when it comes to sourcing. Profit Bandit does all the math for you to calculate your ROI as you source. It also has links to check price and sales rank history.

**Groupon** - People assume Groupon is only for saving money on traveling, eating out, or other experiences... but they have an entire section called Groupon Goods where you can find something to sell in almost every Amazon category.

**Evernote** - A great place to store your notes on each store, BOLOs, pictures of things to remember, and more! It's not only a phone app, but also syncs with your computer so you can have everything organized.

**Retail Me Not** - This app has saved me hundreds of dollars. You can find thousands of promotional and coupon codes for both online and brick & mortar stores. Simply search the store, and the discounts will follow.

**Track My Mileage** - Don't forget that the mileage you drive while working (sourcing, delivering boxes to UPS, etc) is tax deductible. Use this app to track your mileage and when needed, export your stats to your computer.

**Key Ring** - You no longer need to carry around every store's discount card on your keychain. This app not only stores all of your discount cards in one easy place, but they also let you know about various store sales and discount codes.

**The eBay App** - Out sourcing for inventory & can't seem to find if an item is selling on Amazon? Use the eBay app to see if it's selling on eBay, and for what price. Then sell it on eBay or create a product page on Amazon.

**Google Maps** - Plan out your sourcing trips and calculate the fastest or shortest route with the Google Maps app. I use this app all the time when I'm doing retail arbitrage or sourcing at garage sales.

**Shop Kick** - Get "kicks" for walking into select retail stores. Once you have enough, you can trade in your "kicks" for FREE gift cards! To learn more, and get 50 free "kicks" go to [www.fulltimefba.com/shopkick-app](http://www.fulltimefba.com/shopkick-app)

**Chameleon** - Similar to Shopkick in that you get points for walking into select retail stores. Turn 20 points into a \$5.00 gift card! To sign up for Chameleon, and get 5 free points, go to [www.fulltimefba.com/chameleon](http://www.fulltimefba.com/chameleon)

**\*Scanner Pro** - Most retail store receipts fade in just a few months. This app is perfect for scanning receipts with your smartphone. Once you scan your receipts, you'll always have a digital copy!

**Raise** - Buy AND sell discounted gift cards with this app! I've bought many gift cards to stores I source at for up to 20% off face value. I often pay \$80 for a \$100 gift card! This works with both retail and online arbitrage.

**\*MileBug** - This is another good mileage app. This one has cloud storage, back ups, cross device syncing, and many other custom settings. Remember, mileage while working can be deducted, so be sure you log your miles.

**\*Discount Stores** - Using the GPS capabilities in your phone, this app will help you locate the discount stores that are close to where you are. With this app, you'll never miss a discount retail store.

**Audible** - Listen to amazing audiobooks that will teach you the skills you need to build a better business. This app is perfect to listen to while sourcing. To get a FREE audiobook, go to [www.fulltimefba.com/audible](http://www.fulltimefba.com/audible)

**Various Store Apps** - Most major (and even some minor) stores have their own apps. Some stores even have multiple apps. These apps include coupons, store finders, product finders, and even store reward capabilities.

The apps with an asterisk (\*) require a one time or monthly fee.
